MEETING DOCUMENT

From:	General Secretariat of the Council
To:	Working Party on Structural Measures and Outermost Regions
N° Cion doc.:	8369/24 + ADD 1 to 23 (COM(2024) 149 final + SWD(2024) 79 final)
Subject:	9th Cohesion Report: - COM PPT

Delegations will find attached the slides that were used by the Commission for presenting the 9th Cohesion Report at the WP on Structural Measures and Outermost Regions on 9 April 2024.

Communication accompanying the 9th Cohesion Report

9th Cohesion Report

- Cohesion Report - a Treaty obligation, published every 3 years
- Needs to set out progress in achieving economic, social and territorial cohesion

Communication

- Summarises the findings of the report,
- Takes stock of policy achievements and
- Draws lessons for the future

Report

1. Economic cohesion
2. Social cohesion
3. Cohesion and territorial diversity
4. The green transition
5. Regional innovation and the digital transition
6. The demographic transition
7. Better governance
8. Public finances, national policies and cohesion
9. The Impact of Cohesion policy

Cohesion policy: growth, competitiveness, quality jobs

- Strong upward convergence in Member States acceding since 2004
 - 52% of EU average in 2004 to 80% in 2023 - cohesion policy support and integration into the Single Market
 - Unemployment rates dropped from an average of 13% to 4%
- Growth driven by high increase of productivity
- Uneven convergence across the EU
- Key role in supporting public investment (13% on average and 51% of government investment in less developed Member States)
- Contribution to administrative capacity and quality of governance

GDP per head and regional growth

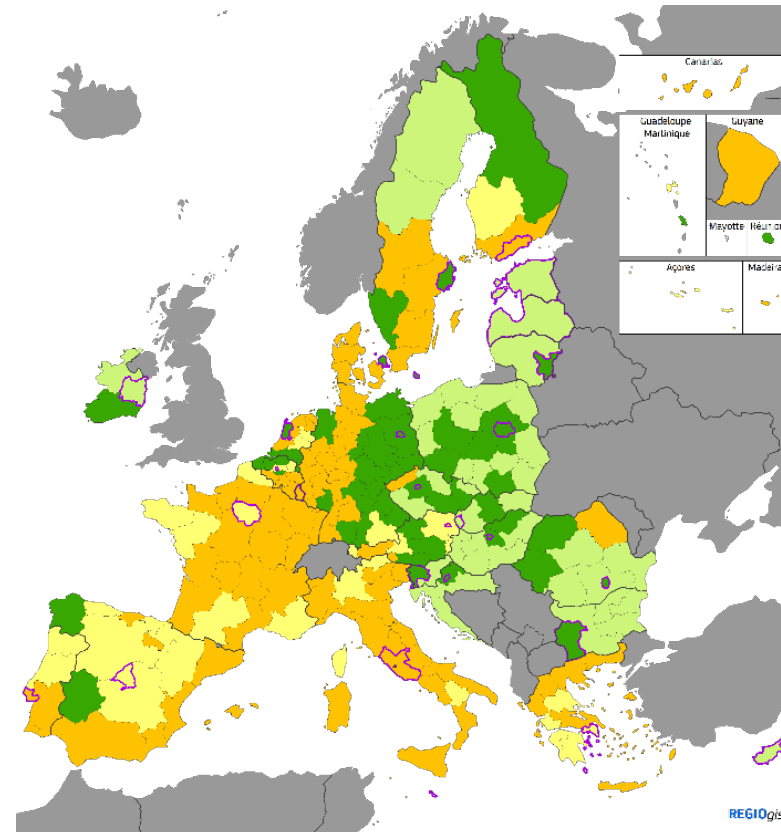

GDP per head (PPS), 2022

- Index, EU-27 = 100
- < 50
 - 50 - 75
 - 75 - 90
 - 90 - 100
 - 100 - 125
 - >= 125

Cohesion Policy strengthens the Single Market and levels the playing field

- Cohesion policy supports regions to reap the benefits of the Single market, fostering investments and exchanges
- Multiplier effect: each euro invested will be tripled by 2043 – 4% annual rate of return
- Cohesion policy benefits all regions, including more developed regions
- Its targeted nature mitigates the risk of crowding out investments
- Persistent difficulties: internal disparities, regions in development trap or lagging behind
- Important role to play in the context of future enlargements

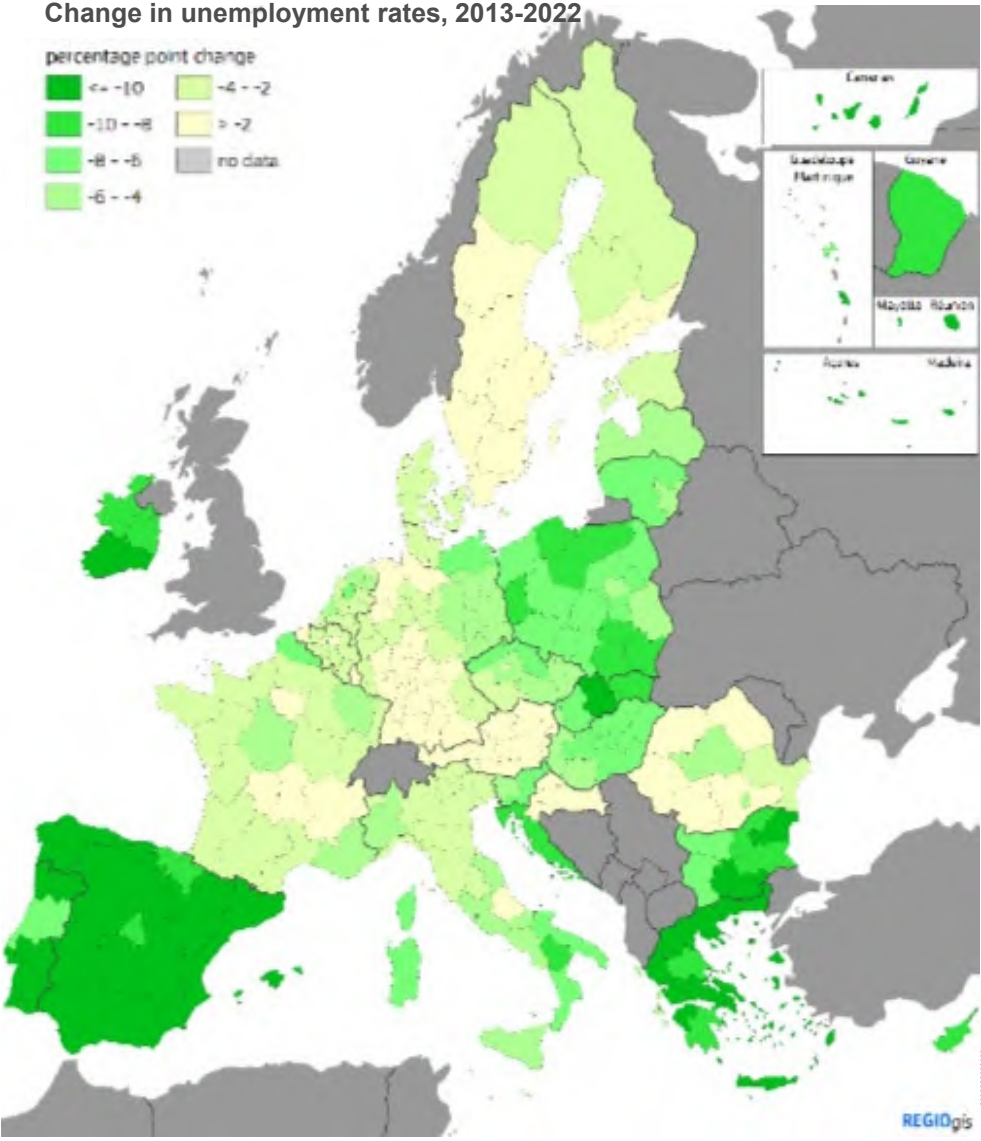

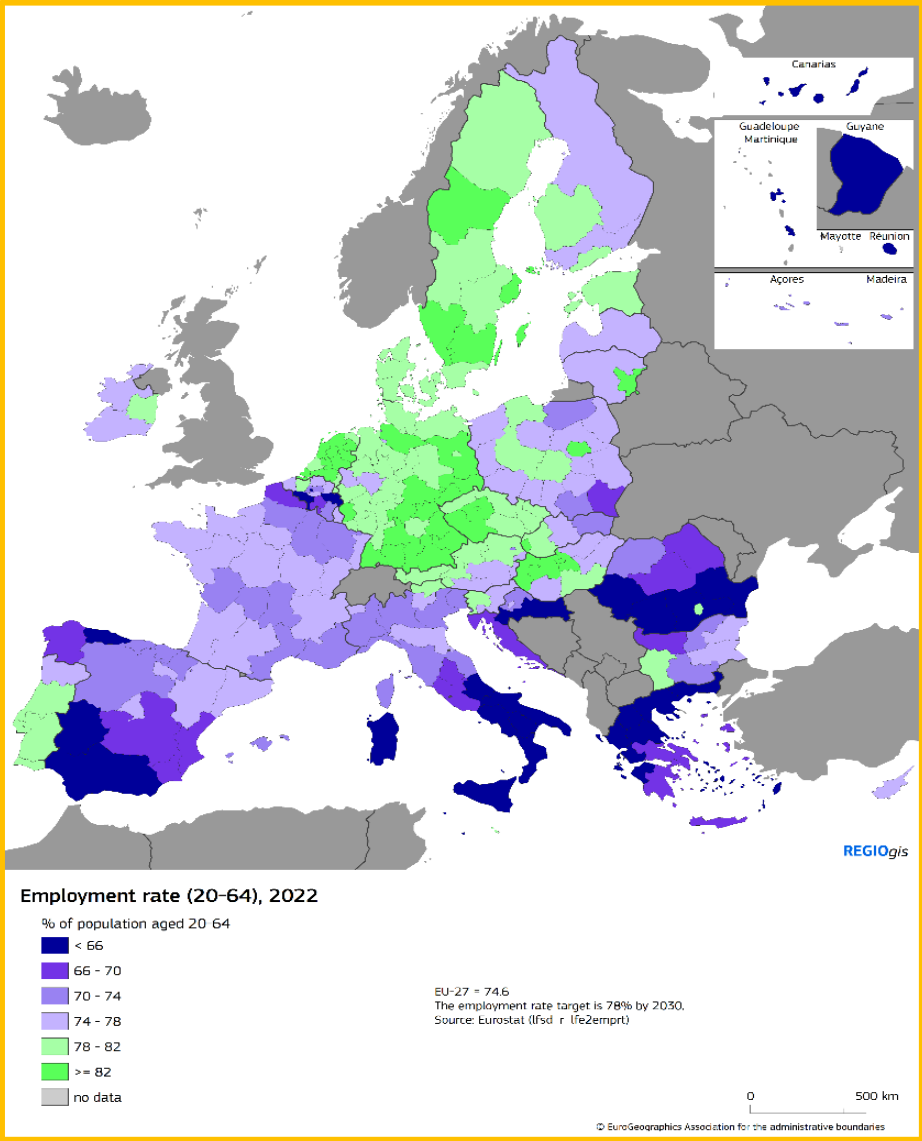

Cohesion policy helped mitigate the impact of crises

- Uneven impact: regions dependent on sectors disrupted by the pandemic or vulnerable to supply chain disruptions and high energy prices were the most impacted
- Cohesion policy reacted promptly (REACT-EU, CRII, CARE, SAFE) – to avoid further widening disparities
- Cohesion support has been complemented by other EU instruments and initiatives: RRF, SURE, REPowerEU
- Fast economic recovery - employment levels back to pre-crisis level in one year
- Vulnerability of regions calls for reinforcing the resilience of their economies and labour markets, investing in future proof European value chains and strategic sectors of Europe - STEP

Social convergence progressed - challenges remain

- Overall improvement esp. in reducing poverty and promoting social inclusion
- Disparities in employment have narrowed, by 5% between less developed and more developed regions
- Unemployment rates converged: halved in less developed regions between 2013 and 2022, to 8%
- NEET rate also dropped by 4% over the same period, at 12%, yet remaining a challenge
- General increase in educational attainment – with concentration of tertiary graduates in cities
- BUT
- Labour and skills shortages on the rise, exacerbated by demographic decline
- Some regions in South and Southeastern Europe are underperforming

Employment rate and change in unemployment rate

Demographic challenges

Regions in a talent development trap
and regions at risk of falling in a talent development trap

- Category
- Shrinking working-age population and lagging level of tertiary education
 - Net out-migration of people aged 15-39
 - Other regions

- Reduction of working age population requires accelerated productivity gains
- Regions with low share of highly skilled people and outmigration of young and educated
- Demographic change requires adaptation – spatial planning, public services, governance

Not all regions benefit from the same growth dynamics

- Still large economic disparities: more than 1 in 4 people of EU population lives in less developed regions
- Increase of internal disparities with different patterns:
 - ✓ *Higher growth of capital regions – Eastern Member States*
 - ✓ *Lower growth of poorer regions – e.g. France, Greece*
- Rural areas face specific challenges hindering their growth
 - BUT their average GDP/head growth is twice that of urban areas (1.5%)
- Growing number of regions face economic stagnation or decline – risk of development trap
 - ✓ *Source of frustration, fuelling political discontent*
 - ✓ *Root causes differ – e.g. insufficient economic specialisation, inefficient innovation ecosystem, weak public governance, skills mismatches*
 - ✓ *Requires analysis and tailored policy responses through reforms and investment*

Unaddressed challenges may widen territorial disparities (1)

Untapped potential for solar, wind and hydro power

MWh/km²/year
≤ 500
500 - 1000
1000 - 5000
5000 - 10000
> 10000
no data

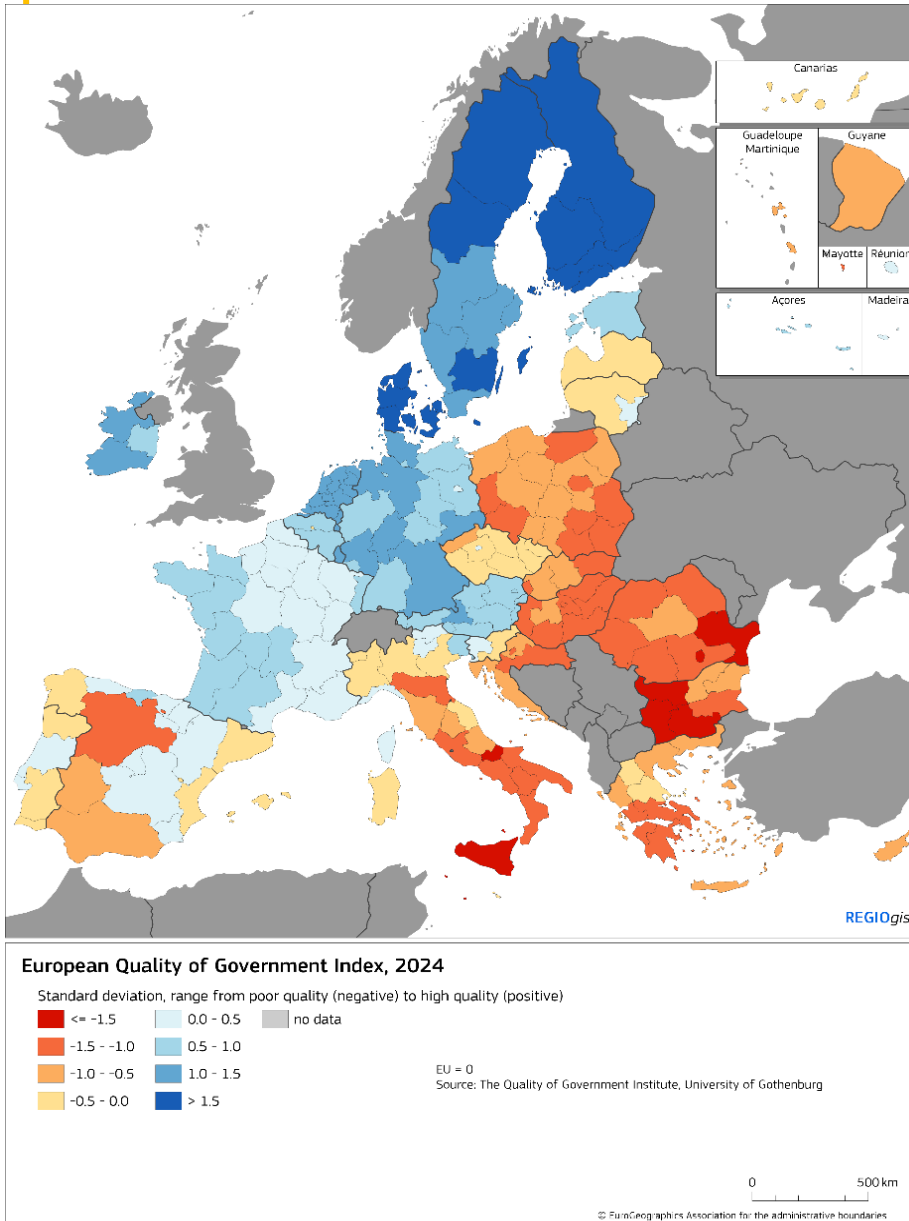

Potential annual production per unit area.

- **Climate transition:** new opportunities, but requires structural changes with negative impact on the most vulnerable
- **Climate change** risks increasing regional inequalities
 - *Coastal, Mediterranean, Southeastern and Eastern regions face annual losses of 1% of GDP*
 - *Requires rapid emission reduction of GHG and air pollutants*
- Comprehensive approach to foster jobs and opportunities; deal with the socio-economic costs

Unaddressed challenges may widen territorial disparities (2)

- **Digital transition** provides opportunities, but people and regions are unevenly equipped to reap benefits
- **Geopolitical tensions** (Russian aggression; conflict in the Middle East) severely impact regions
 - Eastern border regions with knock on effects
 - Southern regions with migration challenges
- **Deficiencies in public governance** and administrative capacity hamper development
- **Quality of institutions** and Rule of Law – crucial for return on investments incl. for enlargement

Drawing lessons for the future - 1

Challenges

- internal disparities, traps
- Disadvantaged regions and people
- Implementation difficulties: in less developed regions, MS

=> Policy design to evolve through lessons from other EU instruments

Build on Treaty objectives of economic, social and territorial cohesion - concentrated support/ higher aid intensity in less developed regions

Embrace diversity of regions, needs, challenges, with more tailored support – build on JTF, smart specialisation approach

More balanced territorial development – relying on medium-sized cities, cooperation

Partnership and multilevel governance

Drawing lessons for the future - 2

- **Promoting institutional convergence** - addressing administrative and governance weaknesses in a comprehensive manner to bring benefits for the Single Market
 - *In national, regional and local administrations*
 - *For beneficiaries and partners*
- **Enhancing effectiveness of Cohesion Policy investment and promoting reforms**
 - *Reforms are needed to remove obstacles to regional development*
 - *The application of enabling conditions may limit capacity to address Member States specific needs*
 - *Increased role of Cohesion Policy within the European Semester*
 - *Take into account RRF lessons in particular stronger complementarity of investments and reforms*
 - *Need to address scope of reforms, role of European Semester and coordination at different levels*

Drawing lessons for the future - 3

- Better **coordination and coherence with national policies** to foster cohesion – shared objective between EU and Member States
 - *Integrating a territorial dimension to reinforce coherence between region-specific needs and horizontal policies at EU and national level*
- **Making the delivery mode more effective and simpler – potential improvements**
 - *Insufficient take up of simplification options under 2021-2027 regulatory framework*
 - *More performance-based implementation with payments based on milestones and targets, experience of the ESF*
 - *Aligned with Treaty objective, taking into account lessons learnt from the regional and place-based approach of Cohesion Policy and the RRF*
- **Reaching long-term objectives but with built-in flexibility** for unforeseen circumstances
 - *Cohesion policy flexibility has increased over time but need to keep the policy's long-term objectives*

Conclusion

- The 9th Cohesion Report highlights significant achievements: the policy fostered upward economic convergence successfully
- Challenges remain especially at subnational level – further affected by structural challenges of the transitions
- Lessons learned show the need for improvement in policy design
- A stronger and modernised policy needed to strengthen the Europe's growth model, build an inclusive Union and deliver on the Treaty objective of economic, social and territorial cohesion
